QUALIFICATION

B.Tech | Computer Science

Engineering	2021-2023
RGPV University	76%

Diploma | Computer Science

Polytechnic	2017-2020
RGPV University	68%
Senior Secondary	2017
MP Board	64%

EXPERTISE

- Proficient in HTML, CSS, and JavaScript for building web page structure, styling, and functionality.
- Skilled in React JS for developing dynamic and interactive user interfaces.
- Experienced in utilizing Tailwind CSS for rapid and efficient UI development.
- Strong understanding of responsive design principles for creating cross-platform compatible websites.
- Ability to write clean, maintainable, and efficient code.
- Proficiency in using Git for version control and collaboration.

CERTIFICATION

- HTML, CSS, and JavaScript Certification
- Completed certification program from Great Learning
- Gained comprehensive knowledge in front-end web development
- Acquired skills in creating responsive and interactive web pages
- Learned best practices in web design, coding standards, and debugging
- Developed hands-on projects showcasing proficiency in HTML, CSS, and JavaScript

Alfaiz Khan
Frontend Developer

CAREER SUMMARY

- Motivated BTech graduate
- Strong foundation in frontend development
- Proficient in HTML, CSS, JavaScript
- Expertise in Tailwind CSS, Bootstrap, and React JS
- Practical project experience
- Seeking entry-level frontend developer position
- Eager to contribute to innovative web applications
- Aspiring for a fulfilling career in web development

EXPERIENCE

Debugshala   **May 2024- Present**

Frontend Trainee

- **Frontend Development:** Actively involved in developing user interfaces using React JS, HTML, CSS, and JavaScript.
- **Project Collaboration:** Collaborating with the Debugshal team on various projects to gain hands-on experience.
- **Skill Enhancement:** Continuously learning and improving proficiency in React JS, JavaScript, HTML, and CSS.
- **Task Execution:** Successfully completing assigned tasks and responsibilities within deadlines.
- **Problem Solving:** Contributing to problem-solving and finding solutions for development challenges.

PROJECTS

Razorpay Clone Static Website
- Project Overview: Developed a static Razorpay clone using HTML, CSS, and Tailwind CSS.
- Technologies Used:
    - HTML: Structured the web page with semantic HTML5 elements.
    - Tailwind CSS: Utilized Tailwind CSS for efficient and responsive styling.
- Key Features:
    - Landing Page: Designed a visually appealing and user-friendly landing page.
    - Responsive Design: Ensured compatibility across various devices and screen sizes.
    - Interactive Elements: Added static placeholders for buttons and links to mimic Razorpay's interface.
- Deployment: Hosted the project on GitHub Pages for public access.

Weather App
- Project Overview: Developed a dynamic weather application using HTML, CSS, and JavaScript, incorporating geolocation features.
- Technologies Used:
    - HTML: Structured the web page content with semantic HTML5 elements.
    - CSS: Styled the application for a clean and modern look.
    - JavaScript: Implemented functionality to fetch and display weather data.
- Key Features:
    - Geolocation: Automatically detects user's location to provide accurate weather information.
    - API Integration: Fetches real-time weather data from a weather API.
    - Responsive Design: Ensures a seamless user experience across different devices and screen sizes.
    - User Interface: Displays current weather conditions, including temperature, humidity, and weather descriptions.
- Deployment: Hosted the project on Netlify for public access.
- Project Link: Weather App

This project highlights my ability to integrate APIs and use geolocation to create a functional and user-friendly weather application.
